-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 January 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

- 6) ☐ Other: _____.

Claims 34-37 remain pending.

Applicants' species elections are acknowledged.

Claims 34 and 37 are characterized as allowable at this time.

The title of the application is objected to. First, it is unclear what is meant by a “short **warp**” conjugate, and it does not appear that the specification explains this. Second, the title is objected to on grammatical grounds. The term “diagnostic” is an adjective, and it would appear that a noun or verb should be present. One option would be to use the title that was used in the parent application. Another option (apart from the issue of “warp”) would be to use the term *diagnostic assay* in place of “diagnostic”.

The abstract is objected to. The abstract should be updated to reflect the subject matter now claimed.

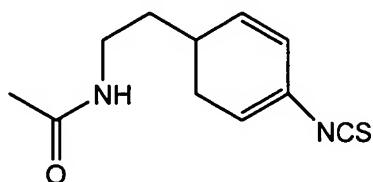

The following is a quotation of the first paragraph of 35 U.S.C. §112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it in such full, clear, concise and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

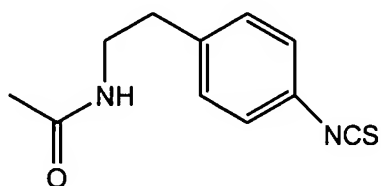

Claims 35-36 are rejected under 35 U.S.C. §112, first paragraph, as containing subject matter which was not described in the specification in such a way as to

reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

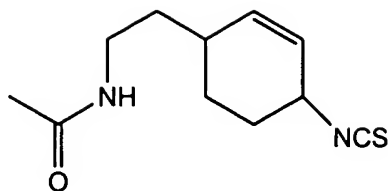

In claim 35, variable R^3 can be any of several substituents including the following:

However, there does not appear to be descriptive support for this. It may be that the fully aromatic homolog is intended, i.e., the following:

Similarly, in claim 36, variable R^3 can be an isothiocyanato cyclohexadiene group, which is not disclosed in the specification as filed. The isothiocyanato cyclohexene homolog may be intended, i.e., the following:

The Japanese and German patents were stricken from the IDS because of the absence of a translation. It is suggested that applicants submit an IDS that makes clear that only the abstracts of these were considered. The following format could be used:

Abstract of DE 19649971, issued May 1998

Note that this should be listed in the "other documents" section. An abstract is not a patent.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Lukton whose telephone number is 571-272-0952. The examiner can normally be reached Monday-Friday from 9:30 to 6:00.
